

INTERNATIONAL SEARCH REPORT

International application No.

PCT/JP2004/004826

A. CLASSIFICATION OF SUBJECT MATTER

Int.Cl⁷ A01N31/02, A61K7/00, A23L3/349

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

Int.Cl⁷ A01N31/02, A61K7/00, A23L3/349

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

CA (STN), REGISTRY (STN)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	GB 1028443 A (Gillette Co.), 04 May, 1966 (04.05.66), Full text (Family: none)	1, 5-7, 11
A	Von J.Reisch, W. Spitzner, K.E. Schulte, "Zur Frage der mikrobiologischen Wirksamkeit einfacher Acetylen-Verbindungen", Arzneimittel- Forschung, 1967, Vol.17, No.7, pages 816 to 825	1-11

☐ Further documents are listed in the continuation of Box C.☐ See patent family annex.

* Special categories of cited documents:

"A" document defining the general state of the art which is not considered to be of particular relevance

"E" earlier application or patent but published on or after the international filing date

"L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)

"O" document referring to an oral disclosure, use, exhibition or other means

"P" document published prior to the international filing date but later than the priority date claimed

"T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention

"X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone

"Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art

"&" document member of the same patent family

Date of the actual completion of the international search
13 July, 2004 (13.07.04)Date of mailing of the international search report
27 July, 2004 (27.07.04)Name and mailing address of the ISA/
Japanese Patent Office

INTERNATIONAL SEARCH REPORT

International application No.

PCT/JP2004/004826

Box No. II Observations where certain claims were found unsearchable (Continuation of item 2 of first sheet)

This international search report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☐ Claims Nos.:
because they relate to parts of the international application that do not comply with the prescribed requirements to such an extent that no meaningful international search can be carried out, specifically:
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

Cosmetic preparations containing chlorphenesin
(3-(4-chlorophenoxy)propane-1,2-diol) as a bactericide/antiseptic were well known to persons skilled in the art.

In view of this, the technical feature common to the choices for the skin preparation composition for external use of claim 1, i.e., "a skin preparation composition for external use containing a compound having the partial structure <HO-CH-C...C>," itself cannot be regarded as "a special technical feature" (a special technical feature which clearly shows a contribution of the whole choices in claim 1 to the prior art).
(continued to extra sheet)

1. ☒ As all required additional search fees were timely paid by the applicant, this international search report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this international search report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☐ No required additional search fees were timely paid by the applicant. Consequently, this international search report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
☒ No protest accompanied the payment of additional search fees.

INTERNATIONAL SEARCH REPORT

International application No.

PCT/JP2004/004826

Continuation of Box No.III of continuation of first sheet(2)

This means that claim 1 involves two or more inventions having no technical relationship involving an identical or corresponding special technical feature. This international application does not hence comply with the requirement of unity of invention as provided for in Rule 13 of the Regulations under the PCT.

The same applies to claim 7.
